

PSY 317 Social Psychology Lab Fall 2024

Course number: PSY317-L01/L02

Meeting time: M & W 2:00-3:40 PM/M & W 12:00-1:40 PM

Location: Clark C79

Instructor: Skylar Yu

Office hours: <https://calendly.com/skylaryu/appointment> Please book an appointment through this link. If none of the times work for you, please email me your availability.

Office location: Clark C45

Email: skylar.yu@colostate.edu

Required Textbook:

You are assigned one book that can be purchased at the CSU bookstore or on-line:

Chambers, C. (2017). The 7 deadly sins of psychology. Princeton, NJ: Princeton University Press.

All other readings are available on electronic course reserve for students to download.

Syllabus last edited on 8/16/2024.

Mental Health and Wellness

CSU is a community that cares. You are not alone. CSU Health Network Mental Health Services has trained professionals who can help. Your student fees provide access to a wide range of mental health and well-being support services.

Call Mental Health Services at (970) 491-6053, and they will work together with you to find out which services are right for you.

[CSU Health Network Mental Health Services](#)
[Student mental health and well-being resources](#)

If you are concerned about a friend or peer, use **Tell Someone** by calling (970) 491-1350 or visiting [Tell Someone](#) to share your concerns with a professional who can discreetly connect the distressed individual with the proper resources. Rams Take Care of Rams.

How to succeed in this course?

1. **Communicate early and often.** If you are having difficulty with the material, or if there is an out-of-class issue that is affecting your performance, the sooner I know about it, the sooner I can help.
2. **Attend classes and participate actively.** Class attendance is critical in this course, since we will have a lot of discussion and activities to help you learn. As you will see more details below, 55% of your total grade is related to in-class participation and discussion.
3. **Complete assigned readings before the class period.** There are readings assigned to most of the days, and you're responsible for reading them before class. Completing the

assigned reading, video, and podcast is essential to be able to participate in the lab's activities and discussions, and failure to do so will make it hard to succeed in this course.

4. **Be proactive and persevere.** Everyone enters this class with different levels of background knowledge and preparation. It is okay to find the material challenging, especially if it is new to you.
5. **Show respect and courtesy to everyone.** Be professional and respectful in your interactions with the instructor, and your classmates. There are many group activities in this course, and I am sure you all want to be a good group member by contributing to the group discussion and working on the big project together. You will learn a lot from each other!
6. **Use screens appropriately in class.** Using screen inappropriately during in-person class periods not only hurts your learning process, but also hurts other people's learning outcome! Let's all be mindful about what you should do with your laptop or tablet during class time.
7. **Prioritize academic integrity.** Avoid any form of academic dishonesty, including plagiarism, cheating, and using generative AI or any unauthorized assistance to complete assignments, as it undermines your learning. Using generative AI, including but not limited to ChatGPT, Claude, and Gemini, to generate your assignments is **prohibited**. Any suspected dishonest work will result in delayed grading until further assessment and discussion between the instructor and the student (see AI policy in a later section in this syllabus for more details).

Course and Learning Objectives

This course is an introduction to research in social psychology. We will investigate...

- If/How the field (as well as others) has experienced a “replicability crisis”;
- Explore the potential structural and methodological factors that may be creating false positives within psychological literature, using case studies of research topics in social psychology.

You will learn about...

- Advances in methods and novel approaches to conducting research that have been developed in response to critiques of past practices;
- The process of scientific publishing and alternative models of disseminating knowledge;
- Issues of civil and productive scientific discourse;
- Issues of inclusivity and accessibility in psychological science;
- Pathways to conducting research in academic and industry settings.
- Upon the completion of this course, you will be able to:
- Understand how crises involving methods and replicability have shaped the field of social psychology.
- Identify advantages and disadvantages of different research methods as applied to social psychology related research questions.
- Identify and correct questionable research and measurement practices in social psychology and understand the harms they pose to the field and larger society.
- Evaluate whether publication practices follow open science standards.
- Understand the challenges involved with replication of research and what these mean for the conclusions we can draw as a field.

- Prepare a pre-registered study and registered report method section and compare reports with classmates and among other PSY317 sections.

Each lab is called a “module” in Canvas, which is where all course materials are located. About two modules will be covered each week, one for each day that the class is scheduled to be held. You will see the terms “lab” and “module” used interchangeably throughout the course.

Email

As the instructor, I strive to respond to your emails within 2 business days (M-F). Please note I am not usually available to answer emails after 5 PM and have limited availability on weekends and university breaks. If you send messages during those times, I may not be able to reply until the next business day.

Please also practice good email habits. Please put “PSY 317” in the subject line of your emails for the fastest attention. Be as specific as you can about your question. Be polite and use respectful language in your email.

By the way, you can call me Skylar, not Dr. Yu (I’m on my way to get my PhD degree) and, not just “Hey.”

Office Hours

You can always use my booking page to make an appointment with me:

<https://calendly.com/skylaryu/appointment>

What can we talk about during office hours?

- Introduce yourself!
- Questions about course materials and assignments
- General questions about psychology, career goals, graduate school, etc.

What are some things you should think/work on yourself first?

- Questions about course policy: please look for answers in the syllabus first. If you are sure that you cannot find the answer in the syllabus, feel free to talk to me.
- Definition questions: if the answer can be easily found by doing a Google search, you should search it first. If you feel that the answer you got from Google is not what you want, feel free to talk to me.

Should we meet in-person or virtually?

- You can choose either way that works the best for you! In the booking page, after you select a time, you will be able to choose the meeting “location” (Clark C45 or through Teams).
- If you select Teams, the meeting link will be in the calendar invite sent to your email.

Course Requirements

Class participation (35%)
 Discussion notebook (20%)
 Lab Replicability Project (15%)
 Final presentation (5%)

Papers (25%)

Many of the assignments for the class are worth different numbers of points, and these point values do not correspond directly to their % value for the final grade. Each of the components is calculated into a percentage that is then weighted to determine your final grade percentage.

Your grade is based on the following:

1. Class participation, 35% of total grade

- a. Attendance is required for all in-person course meetings.
- b. Attendance is not enough to do well in this lab. Active participation in the class will promote learning and create a positive learning environment for all your classmates. To do well, be sure to be in class regularly and if you need to miss a class, be in constant communication with your instructor and classmates that you may be working on projects with. If you are frequently absent, regularly come to class unprepared, do not share your ideas/perspectives during class discussions, and/or do not contribute significantly to in-class activities, this part of your grade will suffer.
- c. When we spend a lot of time on group discussion, your participation will also be rated by your group mates. Make sure you are prepared for each class period.

2. Discussion notebook, 20% of total grade

- a. You'll have a digital discussion notebook (it can be an ongoing google doc) for you to write a brief report on all the in-class discussion activity for the reading or other assigned materials. When we have formal group discussion activity in a class period (I'll also specify that in class), you'll submit that chunk of notes after class (by the end of the day) to obtain points.
- b. This assignment aims to help you remember all those great points from you and your group mates. At the end of the semester, you'll be surprised by how much amazing work you have done this semester.

3. Lab replicability project group work: 15% of total grade

- a. You will be randomly assigned to be part of a small group of 3-5 students. Your task is to design a pre-registered research study that answers a social psychology research question. You will work together and with me to design a study that is communicated in the most transparent way so as to make it replicable. This task affords you the opportunity to practice "doing" transparent work rather than just critiquing the transparency and replicability of other's research. You will also reflect on this process and on how it ties to the course material.

4. Presentation of pre-registered study: 5% of total grade

- a. Your group of the lab replicability project will prepare an in-person short presentation to your classmates about the research study that you created on OSF throughout the second half of the semester. You will walk through the hypotheses, study design, measures, analytic approach, implications, and future directions.

5. Papers: 25% of total grade

- a. You will individually write two papers.
 - i. Pre-registered paper (midterm): You will find a published paper of a study that was initially pre-registered on OSF and then compare what was

reported in the paper to what was written in the OSF pre-registration. Details on what needs to be addressed in this paper are available on Canvas.

- ii. Methods section paper (final): You will individually write a methods section for a paper using APA formatting based on the study proposal you created with your group. This paper needs to be written as clear and transparently as possible, with the intent that others would be able to replicate it easily based on the information provided.

Course Schedule

See the other document named “Course Schedule.”

Letter Grade

Letter Grade	Percentage of final grade
A+	97% or higher
A	94%-96.99%
A-	90-93.99%
B+	87%-89.99%
B	84%-86.99%
B-	80%-83.99%
C+	77%-79.99%
C	70%-76.99%
D	60%-69.99%
F	59.99% or lower

There will **NOT** be any adjustment after the final grades have been determined, even if you are 0.01% away from the next letter grade. There will be multiple extra credit opportunities throughout the semester to offer flexibility.

It is your responsibility to regularly monitor your grade in this class and raise any concerns with your instructor as the course progresses; please do not wait until the end of the semester when it is more difficult to address your concerns and make corrections.

Late Assignments

All assignments will have a 20% deduction for each day (24-hour period) that is late.

- For example, if you submit the assignment within a day after the due time for an assignment, whatever grade you earned will be reduced by 20%. If you submit the assignment two days late, whatever grade you earned will be reduced by 40%, and so on. I understand that you might encounter some technical issues while uploading your work on Canvas.
- There's a 15-minute grace period for Canvas submissions.

- If you submit the assignment a couple of minutes late, there won't be a late penalty.
- If it's more than 15 minutes late, there will be a one-day late penalty. No excuse will be accepted unless you have a university-granted accommodation.

You have **two 24-hour free pass** for Canvas submitted assignments.

- You can only use one free pass in an assignment. By using a free pass for a specific assignment, it will extend the original deadline for 24 hours.
- For example, if you submit an assignment within one day after the due time and use one free pass, there will not be any late penalty; if you submit an assignment two days within the due time and use one free pass, there will be 20% deduction (= late for one day), rather than 40%.
- Please leave a comment on Canvas along with your submission to indicate that you want to use the free pass.

No late submission nor free pass allowed for the final paper. You will NOT be able to submit the final paper after the due time.

Academic Integrity

In this course, we are committed to upholding the principles of academic integrity. As your instructor, I have intentionally designed the course to promote learning in an equitable and honest environment. Throughout this course, you will find abundant opportunities to accumulate points, and your final grade won't be determined by a single paper. Together, we will explore diverse and interesting learning activities. As students in this course, you are expected to engage actively with course materials, complete assignments independently (with opportunities for collaboration and discussion when appropriate), and refrain from any form of academic misconduct. At the end of the course, you will be equipped with knowledge about how to conduct high quality research and read the scientific news with critical thinking, but only if YOU (rather than your peers or generative AI) are the person who engage in learning.

The TILT website on academic integrity is also a good resource if you need more information on CSU guidelines: <http://tilt.colostate.edu/integrity/>.

AI Policy

Artificial Intelligence (AI) is *not permitted* for working on course assignments. There are several important reasons for this policy. First, copying AI-generated text into the work you submit for the course would amount to presenting others' words as your own, which is considered plagiarism. Second, AI engines are unreliable on facts—anything they assert must be checked against reliable sources. Third, AI engines reproduce biases and prejudices from their source material—it is incumbent on us to check and correct for bias. Finally, employing AI eliminates the chance to use and demonstrate our own thinking on a topic. Indeed, the goal of this class is not to generate text artifacts with AI but to develop *your* ability to think critically about social psychology and research methods. As part of developing those skills, the work you submit should reflect *your own* thinking and writing, not products generated by AI.

If you have reviewed the syllabus information so far, congratulations and thank you for reviewing all the material! Email me (skylar.yu@colostate.edu) a picture of your favorite travel location by Aug 30 at midnight and you will be awarded 5 extra credit points under class

participation. Please do not give away this opportunity to other students unless they have also read the syllabus.

Canvas Information and Technical Support

Canvas is where course content, grades, and communication will reside for this course.

Login: canvas.colostate.edu

Support: canvas.colostate.edu/support

For passwords or any other computer-related technical support, contact the [Central IT Technical Support Help Desk](#).

Voice: (970) 491-7276

Email: help@colostate.edu

For info on using browsers, apps, and third-party tools with Canvas see [Student Support Canvas](#).

Diversity and Inclusion

I am committed to fostering a diverse and inclusive learning environment in this course. Diversity enriches our learning experience by exposing us to different perspectives and promoting critical thinking skills. In this course, I actively encourage open dialogue, where every student's voice is valued and respected. I believe that inclusivity is fundamental to promoting academic and personal growth. To maintain this inclusive atmosphere, I employ various strategies, including encouraging open and respectful communication, facilitating diverse perspectives, and empowering student choice.

I am dedicated to helping *all* students learn, and I firmly believe that every student, regardless of their background, has the potential to excel and make meaningful contributions to this class.

Let us work together to create a supportive and welcoming environment where all students can enjoy the learning of psychology and reach their full potential. As psychology is so close to our everyday life, your unique experiences and perspectives are valuable and will enrich our collective learning journey.

Accommodations

CSU is committed to the principle of universal learning. This means that our classroom, our virtual spaces, our practices, and our interactions should be as inclusive as possible. Mutual respect, civility, and the ability to listen and observe others carefully are crucial to universal learning.

If you are a student who will need accommodation in this class, please contact your instructor to discuss your individual needs. Any accommodation must be discussed in a timely manner. A verifying memo from the [Student Disability Center \(SDC\)](#) is required before any accommodation is provided.

[The Student Disability Center \(SDC\)](#) has the authority to verify and confirm the eligibility of students with disabilities for the majority of accommodations. While some accommodations may be provided by other departments, a student is not automatically eligible for those accommodations unless their disability can be verified and the need for the accommodation confirmed, either through SDC or through acceptable means defined by the particular

department. Faculty and staff may consult with the SDC staff whenever there is doubt as to the appropriateness of an accommodative request by a student with a disability.

The goal of SDC is to normalize disability as part of the culture of diversity at Colorado State University. The characteristic of having a disability simply provides the basis of the support that is available to students. The goal is to ensure students with disabilities have the opportunity to be as successful as they have the capability to be.

Support and services are offered to student with functional limitations due to visual, hearing, learning, or mobility disabilities as well as to students who have specific physical or mental health conditions due to epilepsy, diabetes, asthma, AIDS, psychiatric diagnoses, etc. Students who are temporarily disabled are also eligible for support and assistance.

Any student who is enrolled at CSU, and who self-identifies with SDC as having a disability, is eligible for support from SDC. Specific accommodation is determined individually for each student and must be supported by appropriate documentation and/or evaluation of needs consistent with a particular type of disability. SDC reserves the right to ask for any appropriate documentation of disability in order to determine a student's eligibility for accommodations as well as in support for specific accommodative requests. The accommodative process begins once a student meets with an accommodation specialist in the SDC.

If you have circumstances that merit accommodations through the SDC, please notify me as soon as possible. I am happy to work with you to help you succeed in the class. Although I try to monitor accommodations and implement them proactively, I do sometimes need reminders. If you have an accommodation that is not addressed, please let me know at once and I will remedy the situation as quickly as I can.

When Life Happens

If you experience emergency circumstances that adversely affect your performance in the course, such as a major illness, a family emergency, or a traumatic event, please reach out so that we can discuss ways to facilitate your success in the course. Within the bounds of fairness to other students, I would much prefer to work with you so that you can learn the material and complete the work than to see you simply withdraw or fail the course. I often recommend connecting with the office of Student Case Management (<http://www.studentcasemanagement.colostate.edu/>), as they have access to a wide variety of resources to help students in many different circumstances.

If you have other challenges that are making it difficult for you to succeed in this course, please talk with me sooner in the course than later, as we may be able to help you identify strategies or resources to help manage these (again within the bounds of fairness to all students).

Copyrighted Materials

Please do not share material from this course in online, print, or other media (including sharing links to lecture videos with individuals outside CSU). Course material is the property of the instructor who developed the course. Materials authored by third parties and used in the course are also subject to copyright protection. Posting course materials on external sites (commercial or not) violates both copyright law and the CSU Student Conduct Code. Students who share course

content without the instructor's express permission, including with online sites that post materials to sell to other students, could face appropriate disciplinary or legal action.

Undocumented Student Support

Any CSU student who faces challenges or hardships due to their legal status in the United States and believes that it may impact their academic performance in this course is encouraged to visit [Student Support Services](#) for Undocumented, DACA & ASSET for resources and support. Additionally, only if you feel comfortable, please notify your professor so they may pass along any additional resources they may possess.

Food Insecurity

Any CSU student (along with faculty and staff) who is experiencing food insecurity can receive support from the [Rams Against Hunger program](#). Services include a food pantry, a meal-swipe program, pocket pantries, and in-person assistance with navigating federal aid eligibility. The RAH page includes numerous resources as well as county, state and federal programs which are described and linked.

Title IX/Interpersonal Violence

For the full statement regarding role and responsibilities about reporting harassment, sexual harassment, sexual misconduct, domestic violence, dating violence, stalking, and the retaliation policy please go to: [Title IX – Sexual Assault, Sexual Violence, Sexual Harassment](#).

If you feel that your rights have been compromised at CSU, several resources are available to assist:

Student Resolution Center, 200 Lory Student Center, 491-7165

Office of Equal Opportunity, 101 Student Services, 491-5836

A note about interpersonal violence: If you or someone you know has experienced sexual assault, relationship violence and/or stalking, know that you are not alone. As instructors, we are required by law to notify university officials about disclosures related to interpersonal violence. Confidential victim advocates are available 24 hours a day, 365 days a year to provide support related to the emotional, physical, physiological and legal aftermath of interpersonal violence. Contact the Victim Assistance Team at: 970-492-4242.

Religious Observances

CSU does not discriminate on the basis of religion. Reasonable accommodation should be made to allow individuals to observe their established religious holidays.

Please see CSU's [Religious Observances Calendar](#).

Students seeking an exemption from attending class or completing assigned course work for a religious holiday will need to fill out the [Religious Accommodation Request Form](#) and turn it in to the Division of Student Affairs, located on the second level of the Administration building. Once turned in, the Division of Student Affairs will review the request and contact the student accordingly. If approved, the student will receive a memo from the Dean of Students to give to their professor or course instructor.

Students are asked to turn in the request forms as soon as the conflict is noticed. Similarly, unanticipated conflicts requiring a religious observance, such as a death in the family, can also be reviewed.

CSU Principles of Community

Inclusion: We create and nurture inclusive environments and welcome, value and affirm all members of our community, including their various identities, skills, ideas, talents and contributions.

Integrity: We are accountable for our actions and will act ethically and honestly in all our interactions.

Respect: We honor the inherent dignity of all people within an environment where we are committed to freedom of expression, critical discourse, and the advancement of knowledge.

Service: We are responsible, individually and collectively, to give of our time, talents, and resources to promote the well-being of each other and the development of our local, regional, and global communities.

Social Justice: We have the right to be treated and the responsibility to treat others with fairness and equity, the duty to challenge prejudice, and to uphold the laws, policies and procedures that promote justice in all respects.

Student Parents/Guardians/Caregivers

CSU recognizes that student parents/guardians and caregivers face distinctive challenges in succeeding academically, and we are committed to supporting those of you who are parents to achieve course learning outcomes. If you encounter challenges in meeting course expectations – for example, fulfilling attendance and participation requirements or submitting assignments due to a child or person in your care’s illness, essential appointment, school closure, etc. – please contact your instructor as soon as possible (beforehand if feasible or as soon afterward you reasonably can if not). Work with your instructor to develop a plan for you to make up missed work. Also, please see the course syllabus for related course policies. If you need to bring your child or person you care for to class, for example because you’re nursing or planned childcare became unavailable, check with your instructor about whether you may do so if you believe it’s feasible for you to participate in class and support your child or person in your care.

Group work assignments should be designed to provide flexible approaches to participating, and all groups should develop plans that enable all members to contribute equitably. If your group encounters challenges in doing so, please reach out to your instructor to devise a solution.

Finally, know that [pregnant and parenting students are guaranteed equal educational opportunities by Title IX](#); know your rights, the protections provided, and how to advocate for yourself.

Credits & Thanks

The content for this course was curated from and informed by colleagues who have taught similar courses (many have made their course syllabi publicly available on OSF), and via conversations on social media (#OpenScience) and at conferences/workshops (e.g., SIPS; Project TIER).

Final Note

Please note that as the instructor, **I reserve the right to make necessary modifications to the syllabus**, including changes to the schedule, assignments, and course policies, to enhance the learning experience and respond to unforeseen circumstances. Any updates or changes will be promptly communicated to the class **during in-person class period, and an updated version will be uploaded on Canvas**. It is the responsibility of each student to stay informed about any syllabus revisions throughout the semester.
