

Teaching Evaluations

PSY 250 Research Design & Analysis I

Course and evaluation context

Term	Format	Enrollment	Respondents	Response rate
Summer 2026	Online asynchronous	14	3	21.4%

Complete quantitative results (N = 3)

Scale: 1 = strongly disagree; 5 = strongly agree. Positive combines Agree and Strongly agree.

Evaluation item	SD	D	N	A	SA	Mean	Positive
The instructor is knowledgeable about the subject.	0	0	0	0	3	5.00	100.0%
The instructor is enthusiastic about the course.	0	0	0	0	3	5.00	100.0%
The assignment instructions and rubrics are clear.	0	0	0	0	3	5.00	100.0%
The feedback from the instructor has been helpful.	0	0	1	0	2	4.33	66.7%
Overall, I would rate the instructor as good.	0	0	0	0	3	5.00	100.0%
Overall, I would rate the course as good.	0	0	0	1	2	4.67	100.0%

Q7: What did you do well and could improve on as a student?

I think I can improve on being more timely when turning assignments in.

I think that for a portion of psychology that I find really challenging that this course was well set up. I think that I did well on my research proposal and that I tried hard to make it the best I could. I find research and essay type papers to be really challenging as I usually have no motivation to them. Even though I did fall behind in the course, it was not due to the lack of motivation for this class, rather than spending too much time on another class. I am working on better improving my time management as I also tend to take a heavier load than I should in a time that I know is busy. That was the one thing I would have liked to improve for this course.

I think I could've done more notes and the attendance activities! But I will say the attendance activities as a person who has a disability like they are hard for me to like do just because when watching a video it's hard to already pay attention and it was easy for me to like process everything and try to answer and I would miss them half the time

Q8: What should the instructor/course structure improve?

N/A

I think that overall the course was well structured so I really don't have any improvement suggestions. The only thing I found a little frustrating at times was the amount of questions asked per lecture video, but I understand the why it was set up like that and in the end it did end up being helpful with making sure I was following along and understanding the material. I don't really have anything specific that I think could be improved.

Again attendance activities!! also think preparation for the midterm could've gone better! I know the average was low maybe doing corrections just because I didn't know if I got it right and preparing for the final was hard to

Q9: What has the instructor/course structure done well and should continue doing?

I like the lectures and attendance activities

Even though this class was an online class over the summer I do think it was spaced out well and not overly heavy on class work. I also think it was really helpful to have each portion of the research proposal spread out over time to be able to then put it all together at the end. I think that was a good way to keep from making us feel overwhelmed by the whole proposal assignment and giving the whole thing to us all at once.

I loved all the lectures extra credit activities!
